Section 1. Letter of Invitation

Gandhinagar

Date: October 2018

1. Introduction

The Government of India has envisaged the development of Delhi Mumbai Industrial Corridor (DMIC) along the alignment of proposed Multi-modal High Axle Load Dedicated Freight Corridor between Delhi and Mumbai, covering an overall length of 1,483 km. Further, Delhi Mumbai Industrial Corridor Development Corporation Limited (DMICDC), a special purpose company, was incorporated to establish, promote and facilitate development of the DMIC Project.

The Dholera Special Investment Region (DSIR) will be a major Greenfield Industrial Hub planned and located approximately 100km south of Ahmedabad and 130km from the State Capital Gandhinagar. The project as envisaged will be the first initiative from DMICDC to create a linear zone of industrial clusters and nodes to be developed in the influence area of Western Dedicated Freight Corridor (DFC).

DSIR has been planned over an extensive area of land measuring approximately 920sqkm and encompassing 22 villages of Dholera Taluka in the Ahmedabad District. This will be by far the largest of investment nodes planned along the influence of DFC in the DMIC region. This node is strategically located between the industrial cities of Vadodara, Ahmedabad, Rajkot, Surat and Bhavnagar urban agglomerations. The node is linked with various state highways to the ports in Gujarat. The nearest international airport is at Ahmedabad and Government of Gujarat through the Dholera International Airport Company Limited (DIACL) has plans to develop another international airport in the north-east of the proposed investment region. DMICDC, with support of DSIRDA, plan to create an economically and socially balanced new-age City with world class infrastructure and highest quality-of-life standards and sustainability in the urban form. This new age city aims to have a sustainable urban transportation system (transit oriented development) within and mobile/ efficient regional connectivity with neighbouring cities and the rest of the country.

For the DSIR, DMICDC has appointed AECOM as the Programme Manager for New Cities (PMNC). The role of the PMNC is to perform activities necessary to plan, integrate, package, administer and manage the implementation of DSIR projects. Specifically, the PMNC will be responsible for conceptualization of projects and further, during the design and construction stage, overseeing the work of consultants and contractors, including reviewing, monitoring, resolution of interface issues, and reporting to the State nodal agency and the DMICDC on the programme progress. All deliverables from consultant engaged on this project shall be submitted to the PMNC for final approval of DICDL/ DMICDC. As an extension of DMICDC and the state nodal agency, the PMNC will be responsible for taking inputs from stakeholders and communicating them with the consultant. In all day-to-day matters in respect of implementation of this assignment, the Consultant shall report to the PMNC.

The DSIR urban development area is divided into six (6) Town Planning Schemes, under which micro level planning with neighbourhood level infrastructure provisions has been carried out. Town Planning Schemes 1 and 2, which largely cover the development in Phase 1, were sanctioned by Apex Authority (GIDB) on 3 October 2012. Town Planning Scheme 1 covers an area of approximately 51 sq. km and Town Planning Scheme 2 covers an area of approximately 102 sq. km.

For trigger development of Dholera SIR, an Activation Area is identified which acts as a catalyst for further investments and attracts local and global investors. The Activation Area is spread across an area of approximately 22.5sqkm. The area has approximately 72kms of roads and has an optimum mix of land use comprising of industrial, residential, mixed use, recreation and tourism. The area selected is based on immediate availability of land and its future status after implementation of TP schemes (area with the highest opportunity of commencement of site work).

2. **Project Brief**

This assignment is to prepare detailed engineering design and drawings for the river training works for Sukhbhadar River as a basis of long term flood mitigation strategy with the sustainable solutions, which include but not limited to preparation of river sections along with de-silting and bunding to have the proper hydraulic and structural characteristics for the river, identification of the materials for the construction works, limiting the route of the river within the areas which are already available with the Government etc.

The DSIR, when fully developed will be major industrial and business hub, which must be protected from the natural hazard, flooding is one such natural calamity which can affect the DSIR area. DSIR is in the delta of four rivers starting from River Sukhbhadar in the North to Lilka, Utavli, and Khalkhalio River at extreme South and local Khadi (creek) namely Bhadhar creek, Vankol creek, Bavaliyari creek and Sonrai creek to Gulf of Cambay. The flood water of these rivers outflanks the low river banks and spreads on this entire area in form of sheet flow submerging vast land area. For this purpose, DSIRDA/DICDL is seeking Consultancy to assess flood hazard risk, extent of vulnerability, identify the least hazard affected area, provide mitigation plan toward disaster management for DSIR area.

Sukhbhadar River traverses through the TP1 area of the DSIR and discharge into sea through the creek. Adhiya River is tributary of Sukhbhadar River and have small catchment area which carries local village storm & pond overflow water in monsoon season. Origin of Adhiya River is near Gorasu village (TP2W area of DSIR). Adhiya River meets to Sukhbhadar River near Khun village. Sukhbhadar River originates from Madava hills. The River Sukhbhadar is enriched by number of tributaries on its way. Goma River, one of the biggest tributaries of Sukhbhadar River meets River Sukhbhadar near Ranpur (in Ahmadabad District). Sukhbhadar River finally discharges in Bhadar creek of Gulf of Cambay.

Annexure B : Brief Profile of the Project Area

1. Introduction

The Dholera Special Investment Region (DSIR) is envisaged as one of the major nodes in Delhi Mumbai Industrial Corridor (DMIC), and is planned to be developed 100 km south of Ahmedabad, on western side of Gulf of Cambay. DSIR approximately spread over 920 sqkm in administrative area of 23 villages and towns (360 sqkm delineated area within 920sqkm) which is presently taken up for the development and for this study. The DSIR, when fully developed will be major industrial and business hub, which must be protected from the natural hazard, flooding is one such natural calamity which can affect the DSIR area. DSIR is in the delta of four rivers starting from River Sukhbhadar in the North to Lilka, Utavli, and Khalkhalio River at extreme South and local Khadi (creek) namely Bhadhar creek, Vankol creek, Bavaliyari creek and Sonrai creek to Gulf of Cambay. The flood water of these rivers outflanks the low river banks and spreads on this entire area in form of sheet flow submerging vast land area. For this purpose, DSIRDA/DICDL is seeking Consultancy to assess flood hazard risk, extent of vulnerability, identify the least hazard affected area, provide mitigation plan toward disaster management for DSIR area.

2. Dholera Special Investment Region Development Plan

The Master Plan for Dholera Special Investment Region (DSIR) has been completed and is available at www.dholerasir.com. The proposed development identified in the DSIR Master Plan has been divided into 3 phases with a preliminary list of potential projects in each phase.

The Dholera Special Investment Region marks the beginning of an urban renaissance for India, one characterized by the creation of new centres for excellence, production and employment enabled by high quality infrastructure and located along India's strategic commercial and movement corridors. It is emblematic of India's growing significance as an emerging economic superpower on the world stage. The city region will establish a 'new urbanism' based on a permeable and legible street hierarchy with strong public transport links that create highly connected local centres, accessible employment hubs and walkable neighbourhoods. Innovative building typologies (adopting green standards) for a range and mix of uses, tenures and densities will be provided, along with a rich green network of parks, open spaces and waterways.

Sustainability principles - environmental, economic and social - will underpin all levels of design, infrastructure, implementation and governance of the city region. Dholera will not only serve as the national exemplar for regulated (economically driven) urbanisation, it will also set global standards on resource mobilisation, public – private partnerships, and environmental programmes.

DMICDC and DICDL have appointed AECOM as PMNC for DSIR development. The PMNC has to ensure that the proposed development is not only cost effective but also environment friendly vis-a-vis the normal mode of development/construction currently in use in Gujarat and in India.

3. Sukhbhadar River

Sukhbhadar River traverses through the TP1 area of the DSIR and discharge into sea through the creek. Adhiya River is tributary of Sukhbhadar River and have small catchment area which carries local village storm & pond overflow water in monsoon season. Origin of Adhiya River is near Gorasu village (TP2W area of DSIR). Adhiya River meets to Sukhbhadar River near Khun village. Sukhbhadar River originates from Madava hills. The

River Sukhbhadar is enriched by number of tributaries on its way. Goma River, one of the biggest tributaries of Sukhbhadar River meets River Sukhbhadar near Ranpur (in Ahmadabad District). Sukhbhadar River finally discharges in Bhadar creek of Gulf of Cambay.
